

## DXC Veterans Program

Enabling and supporting veterans to thrive while offering workplaces IT experts to fill skill gaps

## A program that our veterans deserve

Veterans are well-trained, highly skilled and motivated. Yet one in three struggle to find post-service employment.

We know just how valuable their skills are to the Information Technology (IT) industry. That's why we established the DXC Veterans Program.

The program attracts, upskills, and supports veterans who are leaving the Australian Defence Force and want to secure purposeful and rewarding long-term careers in IT.

DXC closely collaborates with business, education, support, and technology partners, to ensure veterans are assisted through recruitment, training, and if needed, with mental and physical wellbeing support.

As a result, DXC customers are given access to highly skilled, reliable and mission-focused team members.

### Business support

Providing highly skilled, service-driven and security cleared staff for DXC's customers

### Culture, diversity and inclusion

Providing an inclusive and culturally aware environment for veterans and their peers, and nurturing diverse and innovative thinking

### Transition and training

Creating education and career pathways, as well as mentoring and networking opportunities for veterans

### Wellbeing and support

Supporting veterans' mental and physical wellbeing through psychological and physiological programs, and workplace as well as community social networks

## Designed for veterans, with customers in mind

The DXC Veterans Program has been designed with, and for, veterans, with our customers in mind.

Led by Professor Neil Curtis, senior security consultant at DXC and a former military and police officer, the program provides our partners and customers access to highly skilled, outcome-driven, security cleared people to meet their IT needs.

As a leading Fortune 500 technology services company with a global ecosystem of technology alliance partners, and a longstanding 45+ year partnership with the Australian Defence Force, DXC enables progression opportunities and long-term career prospects for veterans.

REHABILITATION SERVICE

“The DXC Veterans Program has helped me transition out of Defence, while making sure my family and I are still connected to the veteran community. I have had the opportunity to use my skills learned in Defence and further upskill in IT technologies. The program has supported and empowered me to progress my career and explore new challenges.”

## Ex-veteran DXC employee

40+ veterans undergoing a variety of IT skills training enabled by DXC and its technology partners

20 intern positions within DXC's Cybersecurity Practice in 2022

Veterans employed in key industries such as Defence and National Security

A shared commitment to a socially responsible IT industry

The Veterans Program is part of DXC's Social Impact Practice, improving the lives of people from neurodiverse, First Nations and veteran backgrounds.
